HOW IT WORKS

Open a page and write. The setup is done.

01 PICK A SECTION

The index opposite shows where things go.
In a hurry? Start with “Brain Dump.”

02 ADD THE DETAILS

Add a name, date, or place so the note still makes sense when you come back to it.

03 FIND IT AGAIN

Find the section in the index. On open pages, add a keyword to tell your notes apart.

04 KEEP IT HANDY

Give this notebook a regular spot. For appointments, set a phone reminder too.

Thinking “I’ll remember”? Write it down anyway.
